RB Demock/Cabot response - water & arsenate

Friday

Jerry

Alisa Harris - external affairs person  
 - from PADEP - to attend 2/22 mtg

Jerry

updated report from FTR - Coporsla  
 couple hits on arsenic

SDMS DocID 2137879

several TS hits - above screening  
 lithium above TdO - have no screening level

methane hit

Karen

well should have been vented  
 57 homes scheduled thru 2/13

sending cert mail to others

one for 3/5; one void return from TL in April

scheduling form on 3/14

return 3/5

3/13 is last day for sampling & let crew go  
 after 3/14

setting up residents not present for March & April  
 FTR should receive samples three

FTR/CC

some chemists have worked 14 days & they  
 can't work > 14 days

CC wants to know field sampling schedule

RB

screening levels are levels lower than our health  
 numbers; these levels are internal only!

Ktt
